

Business Energy Saving Checklist

At Energy Locals, we're on a mission to challenge the traditional energy model and make locally generated, carbon free power accessible and affordable for businesses like yours. As part of our dedication to empower businesses, we've put together this handy checklist to help you track and reduce your energy consumption. Sound good? Let's get started!

Lighting

- Replace traditional incandescent light bulbs with energy efficient LED light bulbs.
- Install dimmers, motion sensors or timers to control lighting in unoccupied areas.
- Use natural light where possible by keeping windows clear and open.

Heating, Ventilation & Air Conditioning (HVAC)

- Schedule regular maintenance for HVAC systems to ensure optimal performance.
- Consider upgrading to energy-efficient HVAC systems.
- Consider installing programmable thermostats to efficiently regulate temperature during business hours.

Insulation

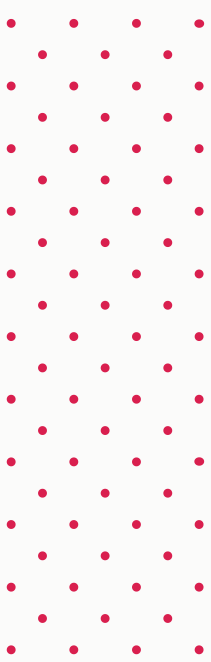

- Inspect the building for air leaks and seal them using weatherstripping or caulk.
- Improve insulation in walls, ceilings, and windows to minimise heat loss/gain

Appliances & Equipment

- Upgrade to energy efficient appliances with high Energy Star Ratings in break rooms or kitchens
- Encourage employees to turn off appliances and equipment when not in use

Power Management

- Enable power-saving features on computers and other electronic devices to conserve energy efficiently.
- Invest in smart power strips that automatically cut power to devices in standby mode.

Employee Awareness

- Educate employees about the importance of energy efficiency and provide tips.
- Encourage energy-saving habits and recognise employees' efforts.

Green Certifications & Incentives

- Check for local or national programs that offer incentives or certifications for energy-efficient practices

Track your usage

- As an Energy Locals business member, access valuable insights on your energy consumption through your online account. Visit <https://energylocals.com.au/my-account> for a comprehensive breakdown of your energy usage and discover more ways to save.
